

OVERPRINT VARNISHES FOR USE ON ANY SHEET FED PRESS

OVERPRINT VARNISHES

SONSHINE • SONMATT • SONSATIN • SONSEAL

Overprint Varnishes

FOR USE ON ANY TYPE OF SHEETFED OFFSET PRESS

■ SonShine

High Gloss Overprint Varnish. Sonshine provides an exceptionally high degree of abrasion resistance to the printed matter and withstands cutting and creasing. Sonshine has a very low tack, preventing the varnish from smearing when printing wet-on-wet.

After varnishing the printed matter can be handled quickly. Sonshine's special composition minimizes the risk of blocking.

SonShine can be used for both wet-on-wet and wet-on-dry printing.

V5039 - 1 kg vacuum tin

V5040 - 2.5 kg vacuum tin

■ SonMatt

Matt Overprint Varnish. Provides an excellent matt effect to the printed matter. Spot varnishing or using a combination of glossy and matt varnish can create special effects.

SonMatt can be used for both wet-on-wet and wet-on-dry printing

V5081 - 1 kg vacuum tin

V5080 - 2.5 kg vacuum tin

■ SonSatin

Satin Overprint Varnish which can be used as any classic press varnish. SonSatin is particularly suitable for printing on Matt MC stocks. This varnish provides an excellent rub-resistance to the printed matter, without affecting the matt effect of the paper.

SonSatin can be used for wet-on-wet printing.

V5010 – 2.5 kg vacuum tin

■ SonSeal

Universal high gloss overprint varnish which can be used as any classic press varnish. SonSeal offers good protection to the printed matter in a quick and economical way.

SonSeal can be used for both wet-on-wet and wet-on-dry printing.

V5060 - 2.5 kg vacuum tin

■ Anti-Ghosting Varnish

A unique product! This varnish hides the effects of ghosting in the printed matter. Apply to the material to be printed in the same way as classic press varnish. For best performance, use only for wet-on-dry printing.

Recommendation: Always print proofs before beginning!

Note: Only use this varnish after ghosting has appeared.
